

Welcome

Dear reviewer,

You participate in a study where you perform code reviews with a researcher to contribute to our understanding of the cognitive process reviewers go through during code reviews.

This short questionnaire collects demographic data about you that will help to anonymously show who are the participants in our study. It also helps to understand what type of reviewers do other developers recommend as great ones.

Thank you for your help!

Your response is voluntary.

Your responses are going to be paired with the anonymised transcripts of the review session.

☐ Hereby I confirm that I have read the data handling policy, I am of legal age, and I agree with my participation in the study.
